

Crypto on the go

The world's leading cryptobank

Cryptocurrencies are a powerful asset for trading and investment – that is something everyone can agree on. Yet they don't have much use beyond that today. Can you go out and buy a cup of coffee with your favorite cryptocurrency right now? Probably not.

Crypterium wants to change that. We develop a **mobile app that meets the banking needs of the “Cryptocurrency Era.”**

Leading with the payments, we are growing globally as the world's leading cryptobank. Our goal is clear: with Crypterium, whatever you can do with money you will be able to do with cryptocurrencies.

“50 Rising Stars in Fintech”

According to KPMG & H2 Ventures

Top 50 Digital Banks

According to Financial IT

What we build

Easily buy crypto

- + Buy crypto in few clicks from bank cards and accounts
- + At any ATMs worldwide
- + Get crypto in retail shops paying with cash or traditional cards

Instantly with minimal fees

Use crypto in everyday life

- + Pay with crypto at 42 million NFC terminals and online
- + Pay bills & taxes, loans & mortgages
- + Send money across the globe using just the recipient's phone number

Crypto is easy. You just need the right tools

Save & Invest

- + Send crypto directly to bank cards and accounts
- + Cash out at ATMs
- + Follow and automatically copy top performing investors around the globe

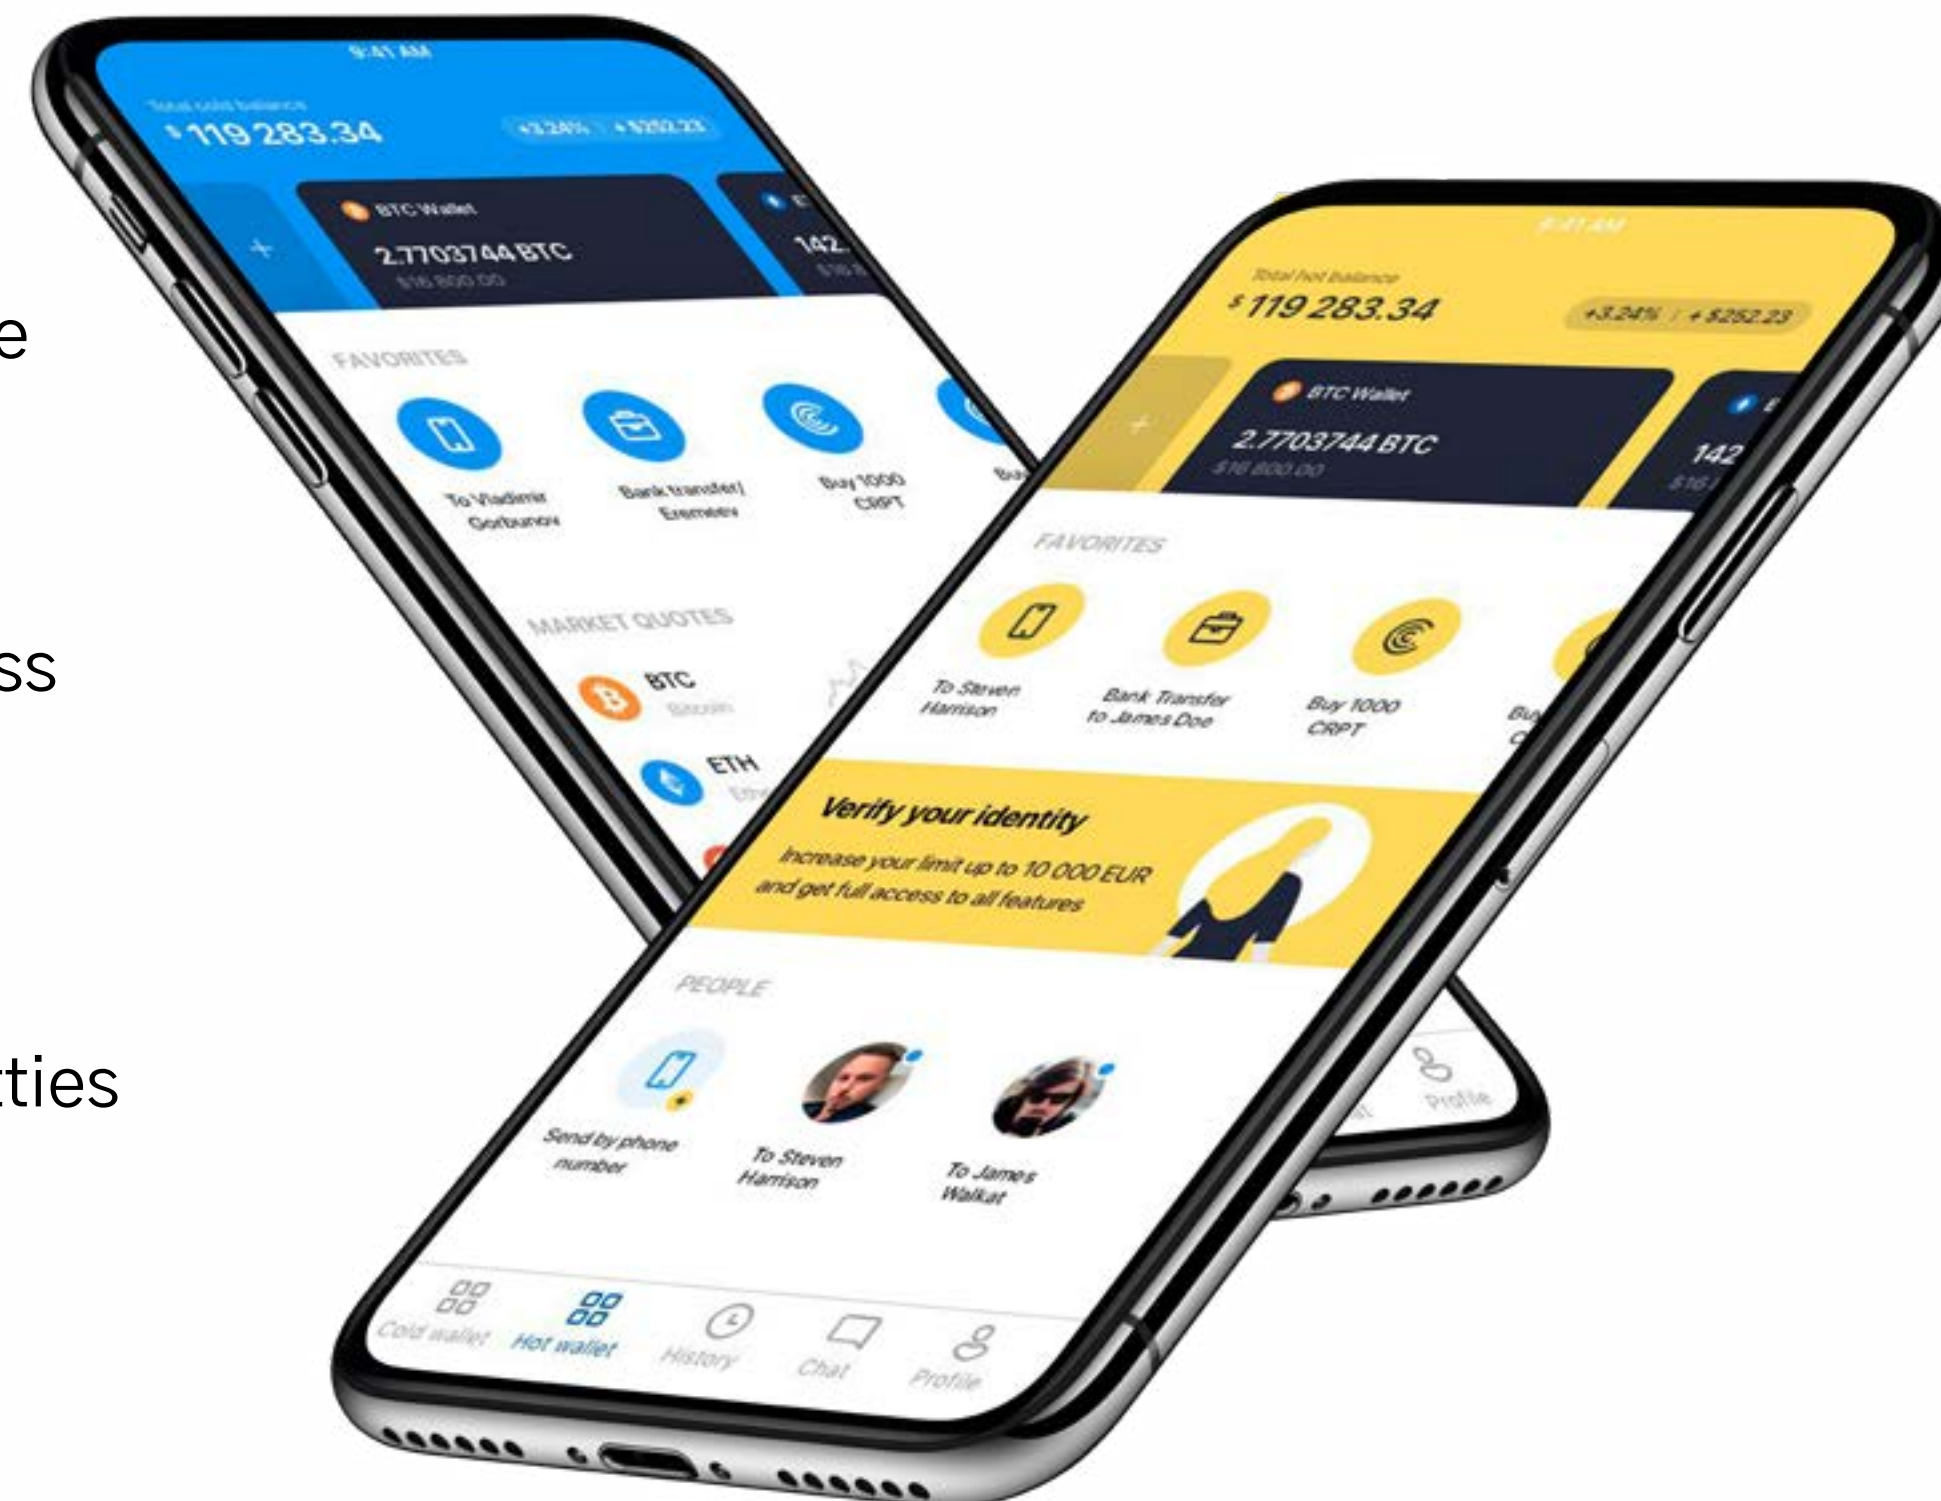

We save you the exchange hassle

The Ultimate Wallet

Crypterium App is the essence of all our services allowing users to operate with their digital assets from a single access point. Crypterium is building the first ever hybrid crypto wallet that combines the best of “hot” and “cold” wallets

Cold wallet

- + Use the most secure solution to store your crypto
- + Import any other crypto wallet, access your funds in MyEtherWallet, Jaxx, Blockchain.info etc.
- + Get access to dApps, from CryptoKitties to decentralized exchanges
- + Take part in ICOs and airdrops

Hot wallet

- + Easily receive, store and send crypto
- + Buy crypto from bank accounts and cards. Exchange it at the best rates
- + Send crypto directly to bank accounts or spend it wherever and whenever you want
- + Deposit your crypto or borrow against it

First global crypto cards

We're building the most advanced payments solution on the market.
You pay with crypto, merchants get fiat, we do the magic behind the scene

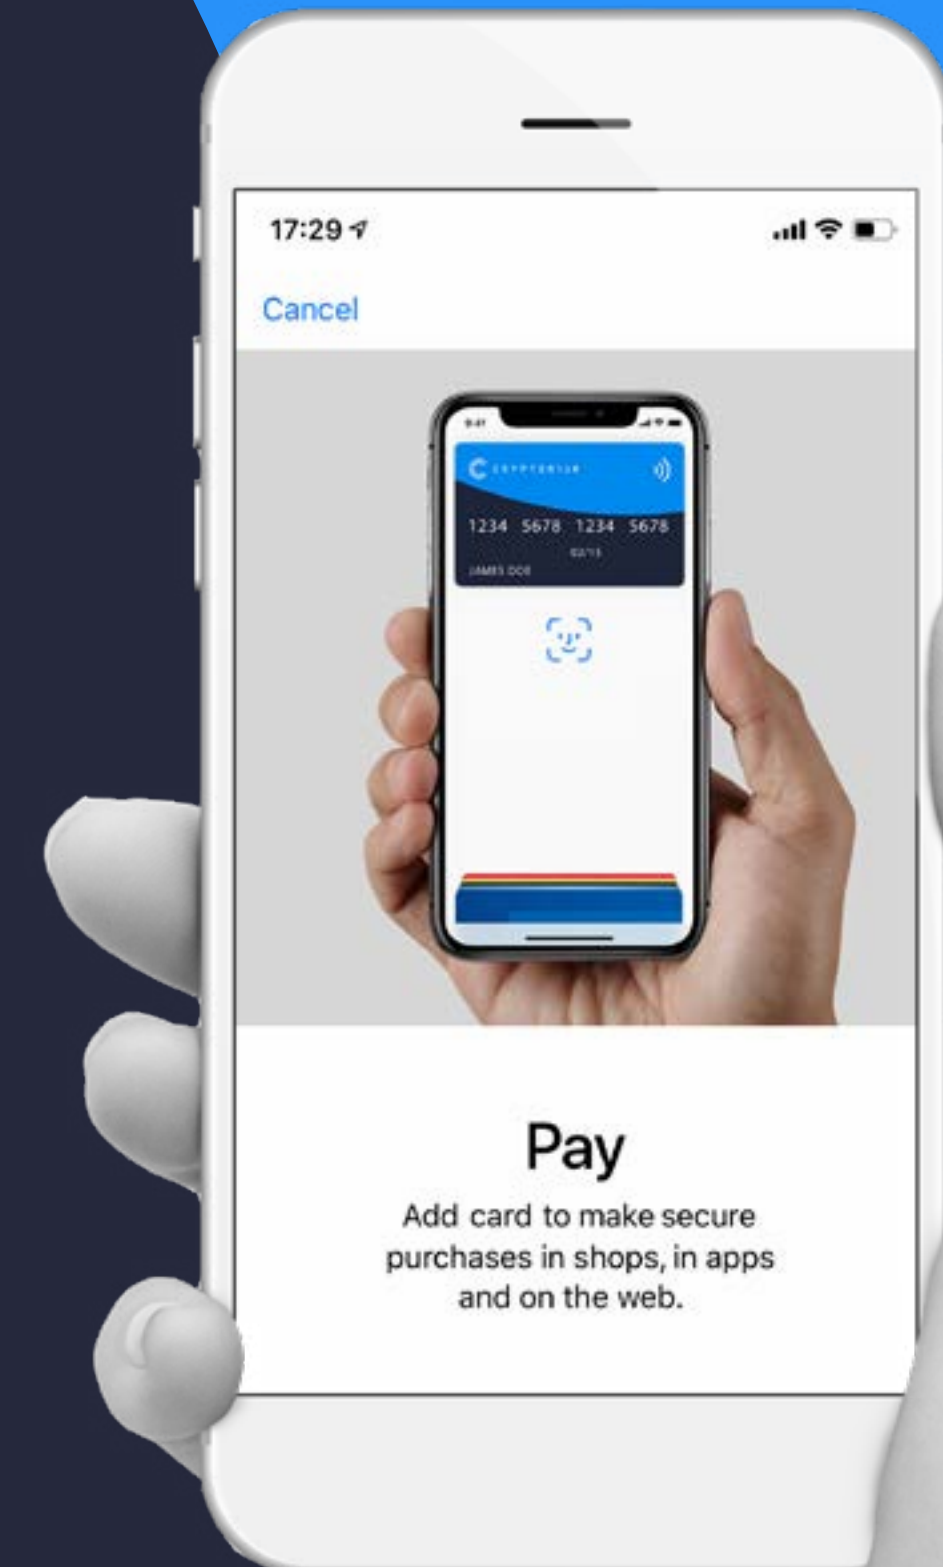

Stay classic

The world is moving digital, but not everything moves as fast as us. You will still be able to get a Crypterium plastic card for use at ATMs or at retailers that do not support tap and pay technology

Go virtual

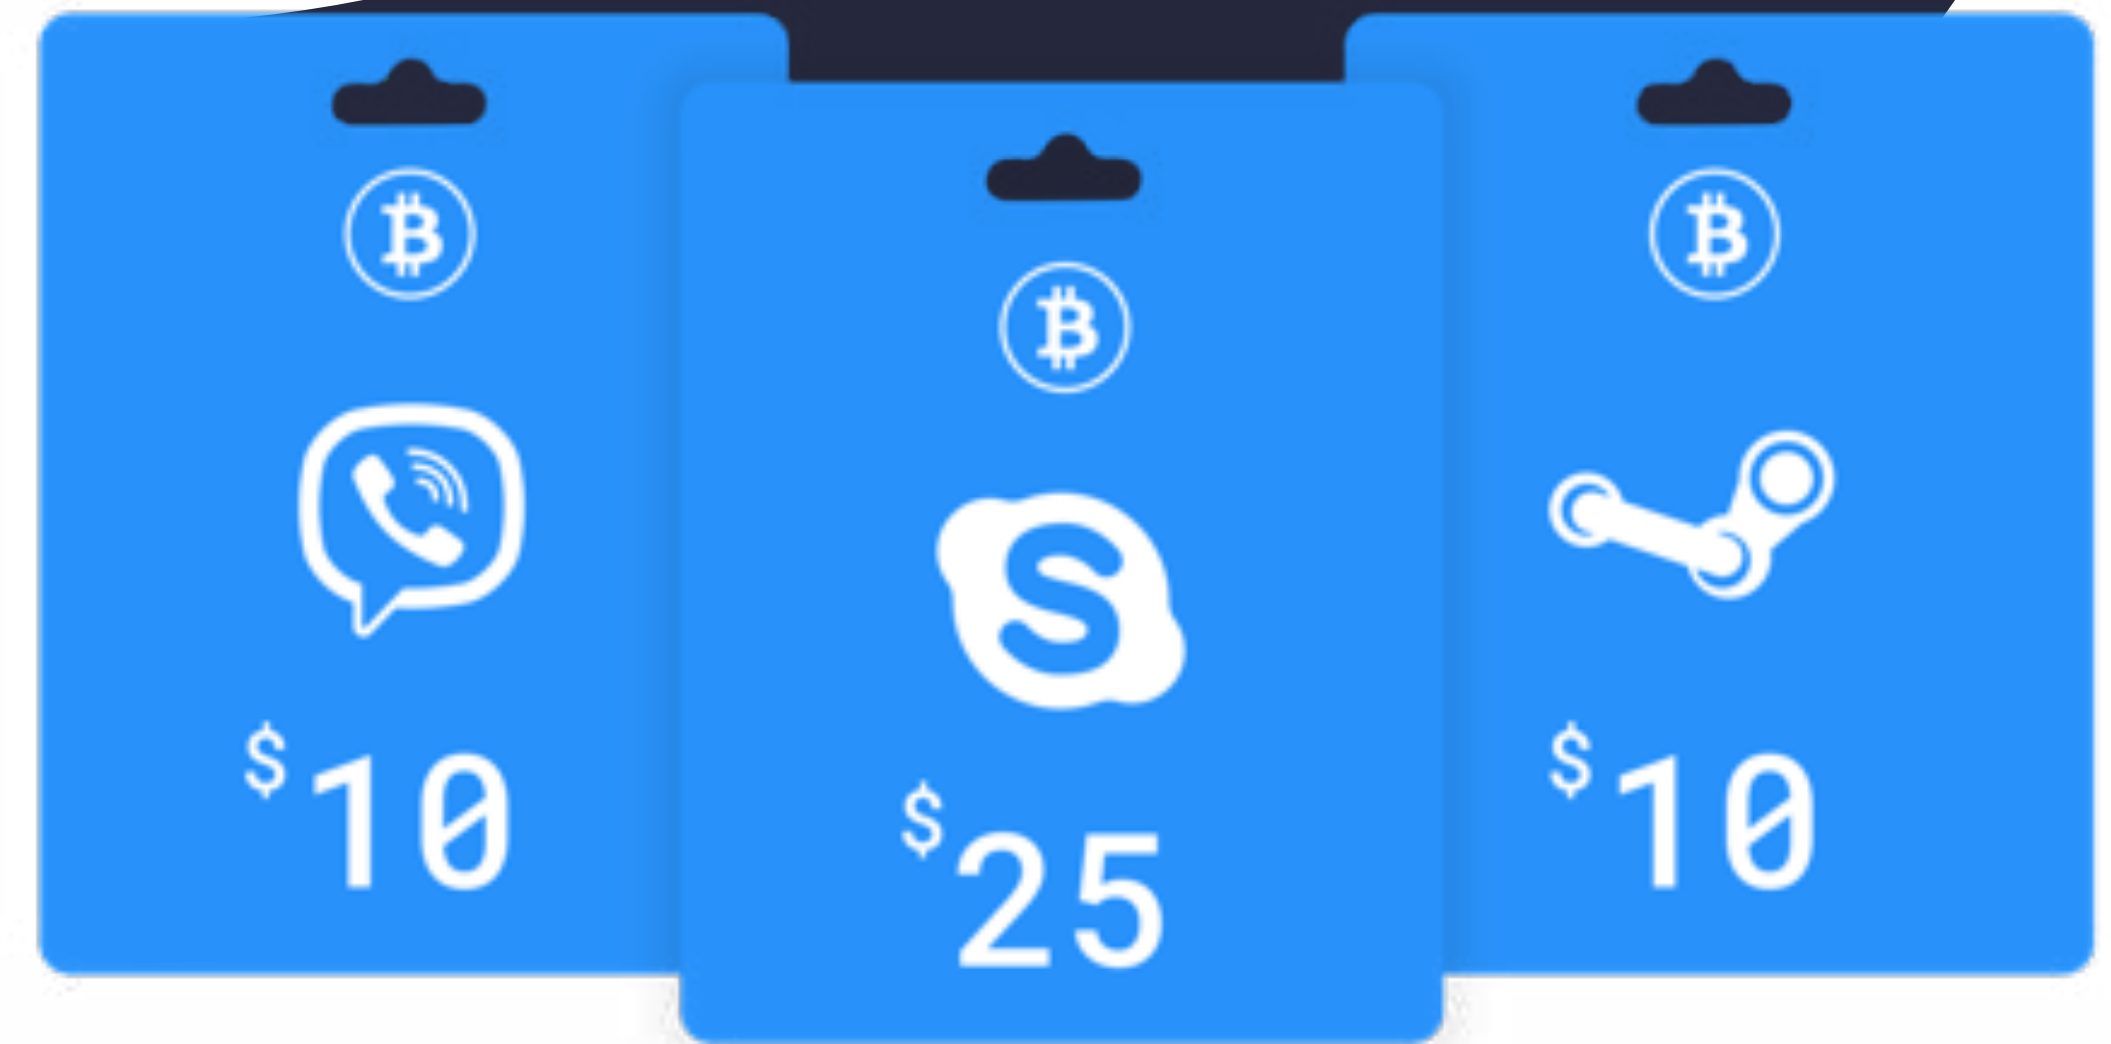

Crypterium will let you get a virtual card, bind it to your crypto account, and link it to Apple Pay or Android Pay. With a tap of your phone you will be able to enjoy convenient checkouts for your everyday purchases

Crypto shopping on the go

Sometimes, the easiest way to pay is straight from the app

- + Top up your phone mobile phone balance in over 100 countries. No matter where you are the top-up will be credited instantly
- + Need to refill your messaging app account? Or maybe you want to expand your gaming library? Crypterium lets you refill Skype, Viber and Steam credits in under a minute
- + The number of options will expand exponentially over the next 2-3 years

Bank products

Crypto should be no different than traditional money. We bring the most popular use cases to bring the mass adoption of cryptocurrencies closer

Crypto Deposits

Got crypto sitting in storage, another wallet or an exchange? Put it to work. Get paid for holding your cryptocurrencies in the Crypterium App

Crypto Loans

Don't sell your crypto and lose the upside potential. Use it as a collateral to easily get loans

Investment Tools

Discover, follow and automatically copy top performing investors around the globe. Become an expert by copying other experts

Who we build our App for

The cryptocurrency market is growing exponentially. There are already over 25 million cryptocurrency users. The number is expected to reach 200 million by 2024

Number of Blockchain wallet users globally 2015-2018

15 largest

crypto merchant services
process hundreds of millions
worth of payments monthly

40%

of Americans want to use Bitcoin
for transactions and purchases

400K

users registered in Crypterium
ecosystem

Core team

Our management team is made up of C-suite executives with worldwide experience in the most innovative FinTech companies

James Davies

CFO

Former COO of London Derivatives Exchange, an exchange focused on operating trading venues

Rafael Carrascosa

VP, Global Partnerships

Banking and Payments executive and business entrepreneur in Financial Services, FinTech and Consulting

CRPT token

0,5% fuel

CRPT tokens are issued by Crypterium and used as «fuel» for performing transactions with Crypterium app. You can compare it to “gas” powering the transactions on Ethereum

Every time someone makes a payment using Crypterium App, a fee equal to 0.5% of the value of the transaction in CRPT is taken from user’s account and burned as fuel. This means the number of tokens will be reducing over time
